Compliance Division

presents

Metal Container, Closure and Coil Coating Operations

Course No. 230.3

This one day course addresses the manufacture of two and three piece cans and the chemical and physical demands on the organic coatings applied to them. We will review the costs of various coating technologies in emissions and fuel. And the introduction of exotic cure coatings in the packaging industry. Finally we will discuss the air inspection and documenting compliance with district rules.

**Nov 30, 2004
8:30 AM - 5:00 PM
Location TBA**

Modesto, CA

Class includes an afternoon field visit. Field visit and exam are mandatory to obtain a certificate of completion. Appropriate safety gear including steel toed shoes, ear and eye protection may be required. There will be an enrollment fee.
